Lab Assignment IX
Report
(Sri Chaitanya Patluri
Class ID: 44)

Application Name(MyIonicApp): A Custom Reddit App showing Latest News about Television Shows in USA using Ionic Framework with infinite scroll and inapp browser plugin.

Application Function: The Ionic Application can be used to view latest news about Television shows in USA, The data from app is powered by a Subreddit "Television" in the form of json files. This app also has "Infinite Scroll" which allows user to browse all the older stories in the forum and it also has "Refresh Pull" which allows user to refresh the app with new stories on pulling the app screen from top. The selected stories will be opened in a inapp browser on android phone.

Tools Used:
Adobe Brackets

Number of Pages: 1
Index.html

Plugins used:
Cordova-plugin-InAppBrowser

Working:

The Application can be opened in both Web Browser and as Mobile Application, as it is built from Ionic Framework. The user can view all the latest news about television shows. user can also view older stories by scrolling down and newer stories by pulling from the top refreshing the App. When a story is selected, the user is redirected to the story in a webpage in an inapp browser wihtout leaving the app in an android phone.
